ACTU2122 Additional life insurance components

[30h] 3 credits

Teacher(s): Michel Denuit
Language: French
Level: Second cycle

Main themes

To familiarise students with the theory of life insurance policies covering several people, and to make a detailed study the theoretical bases of these transaction, and of transactions covering just one person.

Content and teaching methods

Content

The same subject as on Course ACTU 2121, but with more technical additional clauses, and clauses covering several people. There will also be an examination of invalidity insurance.

Methodology

The course will be delivered in the form of lectures. Improvised theoretical exercises will ensure that students participate actively.

Other credits in programs
