

**BIOL3346 Diagnostic écologique**

[30h] 2 credits

This two-yearly course is taught in 2007-2008, 2009-2010,...

**Teacher(s):** Renate Wesselingh  
**Language:** French  
**Level:** Third cycle

**Aims**

Help the student in his advanced study of different groups of plants and/or animals, mostly on the aspects of taxonomy and classification.

**Main themes**

These work sessions will consist for example of occidental europe Angiosperms and/or Cryptogams (like Bryophytes, diatomeesXX, ..), l'avifauneXX, l'entomofauneXX, (LepidopteresXX, microfaune des litieresXX). The observations will be, depending on the circumstances, on anterior collections and of more recent ones; they will end by a seminary relative to they group studied.

**Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)**

Prerequisites: basics in plant and animal biology, ecology and biogeography (second cycle level).

Evaluation: summary report on the studied group.

Assisted work: seminars on methodologies used to evaluate the biological and biodiversity quality.

Support: books and specialized articles.

**Other credits in programs**

**SC3DA/B** Diplôme d'études approfondies en sciences (Biologie) (2 credits)
