DEMO3410 History of demography and of human population

[15h] 2.5 credits

This course is taught in the 1st semester

Teacher(s): Eric Vilquin
Language: French
Level: Third cycle

Aims

To give students a grounding in the history of population and the history of demography, and to impress on them the importance of long-term historical trends in terms of demography, and of the variety and interdependence of the development of the various components of the demographic dynamic.

Main themes

Basic concepts.

A global history of the peopling of the planet; and case studies on particular periods in the history of the populations of some countries.

A history of the methods of demographic analysis and of the tenets of population.

Content and teaching methods

Methodology

Lectures.

A brief study of the history of the peopling of the world, with a closer focus on the more important "accidents". A detailed examination of the European demographic system since the 16th century. Specific characteristics of demographic history on other continents.

The birth and historical development of the scientific analysis tools of demographical situations. An overview of the main tenets of population.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Assessment: A dossier on a subject to be approved by the teacher.
