

Faculty of Medicine

DENT2351 Clinic of Periodontology, 1st Part.

[15h] 1.5 credits

Teacher(s): Pierre Bercy, Patrick OBEID
Language: French
Level: Second cycle

Aims

The student must be able to diagnose the different forms of periodontal disease found in his or her patients, to propose a treatment and to work out the aetiological part of periodontal therapy: oral hygiene instructions, scaling and root planing.

Main themes

- Abording the patient, medical chart and intra oral examination.
- Establishment of a diagnosis based upon collected data.
- Achievement of indicated treatment (beside the surgical aspects).

Content and teaching methods

Contents:

- Periodontal examination.
- Periodontal chart and diagnosis.
- Treatment: Oral health instructions.
- Scaling.
- Root planing.
- Maintenance therapy.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Pre-required:

- Theoretical basis in periodontology + preclinical exercises.

Evaluation:

- Continuous evaluation by assistants assuring supervision.
- Clinical examination after case presentation.
- Seminary: synthesis on a selected subject.
