

Faculty of Medicine

DENT2400 Eléments d'oto-rhino-laryngologie

[15h]

Teacher(s): Bernard Bertrand
Language: French
Level: Second cycle

Aims

To teach the students in 3rd licence in dentistry a course upon the main pathophysiology of otorhinolaryngology which is linked to their future practice

Main themes

Description and comment of the pathophysiology of the various fields of otorhinolaryngology, including allergy of the nose, and balance. The pathophysiology of phoniatrics is excluded.

Analysis and description of the most commonly performed tests and clinical exams in ENT. Samples of medical imagery of the main ORL pathologies are shown and commented. Medical and surgical treatments are exposed together with comments on differential diagnosis.

Content and teaching methods

The pathophysiology of hearing and balance, with their various clinical tests, eg. Acoumetry, audiometry, impedancemetry, microotostcopy, electronystagmography, are exposed. The most common pathologies of the ears together with their medical and surgical treatments are reported. The diseases of the pharynx and the tonsils and their treatments are taught more in details. Physiology and diseases of the nose and sinuses - eg. rhinitis, sinusitis, nasal allergy and cancers - and common congenital dysmorphic syndromes are presented. Inborn neck diseases are exposed briefly. Differential diagnosis are studied and commented in each field of ORL.

Other information (prerequisite, evaluation (assessment methods), course materials recommended readings, ...)

Magistral course with slides and syllabi.
 Written exam.

Other credits in programs

DENT23	Troisième licence en science dentaire	Mandatory
