**INTR2260** Complements in hepato-gastroenterology

[15h] 2 credits

Teacher(s): Thierry De Ronde, Pierre Deprez (coord.), Olivier Dewit, Michel Melange, Hubert Piessevaux, Peter Starkel
Language: French
Level: Second cycle

Aims

The objective is to acquaint students with the major problems in gastrointestinal disease and familiarize them with approaches and techniques involved in treatment.

Main themes

The course will provide students with a deep understanding of the pathophysiology and clinical aspects of gastroenterology. There will be an emphasis on diagnosis and therapeutics, including exposure to gastrointestinal procedures and management the syndromes and diseases most frequently encountered in hepato-gastroenterology.

The course is organized in ten sessions of 90 minutes during which the students have the possibility to intervene, ask questions and discuss the proposed management.

The following topics will be covered: imaging of the gastrointestinal tract, gastritis and gastroduodenal ulcers, dyspepsia and functional digestive disorders, chronic diarrhea, inflammatory bowel diseases, choledocholithiasis, liver transplantation, new aspects of acute and chronic pancreatitis, colorectal cancer
