PXI ADC

**Short description : ADC Dynamic Characteristics Measurement**

This setup uses an NI PXI-5451 to generate the sine wave and an NI-PXI6561 to acquire digital output from the ADC. The PXIe-6674T is used as a clock source (optional) and the 4-channel low-noise SMU NI-PXIe-4141 to power the ADC and to monitor the consumption.
