**Short description** : The Model 2400 SourceMeter is a 20W instrument that allows sourcing and measuring voltage from +/-5µV (sourcing) and +/-1µV (measuring) to +/-200V DC and current from +/-10pA to +/-1A. It's well-suited for testing a wide range of devices, including diodes, resistors, resistor networks, active circuit protection devices, and portable battery-powered devices and components. It's also useful for systems power sourcing and IDDQ testing applications.
