

K2400_1

Short description : The **Model 2400 SourceMeter** is a 20W instrument that allows sourcing and measuring voltage from $\pm 5\mu\text{V}$ (sourcing) and $\pm 1\mu\text{V}$ (measuring) to $\pm 200\text{V}$ DC and current from $\pm 10\text{pA}$ to $\pm 1\text{A}$. It's well-suited for testing a wide range of devices, including diodes, resistors, resistor networks, active circuit protection devices, and portable battery-powered devices and components. It's also useful for systems power sourcing and IDDQ testing applications.
