

Workshop Mitutoyo Toolmakers Microscope

Short description :

Three eyepieces: WF 10x, WF 15x, WF 20x.

Three Objectives: 2x, 5x, 10x.

Stage movement in X and Y direction with Micrometer heads for measuring 0-50mm travel distance.

Rotatable stage.

Made in Japan by Mitutoyo Corporation.

Bottom transmitted illumination plus dual upper incident illumination.

We have some new optional LED ring lights that fit these small diameter sub-head objectives. This is a great option and an improvement over the standard lighting provided by Mitutoyo. Price is USD 100 for the LED ring light, and is not included in the main price of the equipment. The LED ring light is not shown in the images.

Glass stage (for use of bottom lighting, for viewing profile of your sample specimen).

Condition. This unit is used and has aesthetic imperfections. It has some rust spots on the frame. Our photos are very detailed and show the aesthetic condition. We will be spot painting this unit before shipping it.

The functions and features of this measuring equipment work fine (lights, XY stage movement, focusing, optics, etc).

The unit comes with non-Mitutoyo micrometer heads. But the heads are brand new.
The manual micrometers can be upgraded to digital micrometers for additional cost.

Power cord is included.
