

PXI 6552

Short description : 100 MHz Digital Waveform Generator/Analyzer - 100 MHz maximum clock rate - 20 channels with per-Cycle, per-channel bidirectional control - -2.0 to 5.5 V voltage levels, programmable in 10 mV steps - Real-time hardware comparison of acquired response data - 1,8, or 64 Mb/channel onboard memory - NI Synchronization and Memory Core (SMC) device for subnanosecond multidevice synchronization.
