

Scope DSO7104A

Short description : Lab scope performance

- * 1 GHz bandwidth
- * 4 analog channels
- * 4 GSa/s sample rate
- * Standard 8 Mpts MegaZoom III deep memory

Engineered for the best signal visibility

- * 12.1" XGA display with 256 levels of intensity shows subtle signal detail
- * Industry's-fastest uncompromised update rate of up to 100,000 waveforms/sec displays infrequent events
- * Wide range of application packages
- * Serial decode including: I2C, SPI, CAN, LIN and RS-232/UART
- * Segmented memory
- * PC-based offline analysis and viewing of previously acquired data
- * Power analysis
